**Silver Creek Systems Names Todd Blackmon
Vice President of Customer Solutions**

Seasoned professional brings more than 15 years of operations, strategy and customer service experience to enterprise data quality and usability leader

LOUISVILLE, Colo. – February 14, 2006 – Silver Creek Systems, a provider of enterprise data usability solutions, has appointed Todd Blackmon to the newly created position of Vice President of Customer Solutions.

In his new position, Blackmon will be responsible for assisting customers with their initial deployments and for their longer-term success and leverage of their DataLens solutions.

Blackmon brings more than 15 years of professional services and customer solutions experience to his new position, most recently as Vice President of Operations for CreekPath Systems. While there, he successfully supported enterprise customers while dramatically reducing implementation times and operating costs, as well as streamlining training functions.

“Todd’s appointment demonstrates Silver Creek Systems’ commitment to delivering unsurpassed attention and service to our customers,” said Barbara Mowry, president and CEO of Silver Creek Systems. “We are dedicated to helping our customers gain a competitive edge through better leverage of the data and systems they already have. Our solutions can impact many areas of our customers business, and Todd’s leadership in customer solutions will play an integral role in helping them achieve their goals.”

- more -

Prior to CreekPath Systems, Blackmon held several executive positions with Vignette Corporation, where he focused on professional services to support the customer experience. In addition, he held senior positions with Complete Business Solutions and Electronic Data Systems (EDS).

Blackmon holds a Bachelor of Science in Information Systems and Operations Management, from the University of North Carolina at Greensboro.

About Silver Creek Systems

Silver Creek Systems, based in Louisville, Colo., is a leading enterprise data usability solutions provider. Based on Data Refraction™ technology and Precise Semantic Identification™, the DataLens™ System from Silver Creek Systems resolves data incompatibility and delivers usable data for connecting the enterprise. From data standardization to item matching, attribute extraction to categorization and language translation, the DataLens™ System delivers a breakthrough in data usability to help improve business performance.
